The shift from scientific materialism to a multidimensional worldview in harmony with the worlds great spiritual traditions Articulates humanitys critical choice--to be the last decade of an outgoing, obsolete world, or the first of a new and viable one Presents a new reality map to guide us through the environmental, scientific, and geopolitical upheavals we are experiencing Our world is in a Macrosift. The reality we are experiencing today is a substantially new reality--climate change, global corporations, industrialized agriculture--challenging us to change with our rapidly changing world, lest we perish. In this book, Ervin Laszlo presents a new reality map to guide us through the world shifts we are experiencing--the problems, opportunities, and challenges we face individually as well as collectively--in order to help us understand what we must do during this time of great transition. Sciences cutting edge now views reality as broader, as multiple universes arising in a possibly infinite meta-universe, as well as deeper, extending into dimensions at the subatomic level. Laszlo shows that aspects of human experience that had previously been consigned to the domain of intuition and speculation are now being explored with scientific rigor and urgency. There has been a shift in the materialistic scientific view of reality toward the multidimensional worldview of multiple interconnected realities long known by the worlds great spiritual traditions.
