

Emergence: The Connected Lives of Ants, Brains, Cities and Software (Paperback)

Filesize: 4.27 MB

Reviews

Simply no terms to clarify. It is actually loaded with knowledge and wisdom I am just delighted to let you know that this is the very best publication i have got read through during my individual lifestyle and could be he very best pdf for actually.

(Mr. Caleb Quigley MD)

EMERGENCE: THE CONNECTED LIVES OF ANTS, BRAINS, CITIES AND SOFTWARE (PAPERBACK)

Penguin Books Ltd, United Kingdom, 2002. Paperback. Condition: New. Language: English . Brand New Book. Steven Johnson s Emergence: The Connected Lives of Ants, Brains, Cities and Software is a fascinating look at how self-organising systems are changing the world. Why do people cluster together in neighborhoods?How do internet communities spring up from nowhere?Why is a brain conscious even though no single neuron is?What causes a media frenzy? The answer, as Steven Johnson s groundbreaking book shows, is emergence: change that occurs from the bottom up. When enough individual elements interact and organize themselves, the result is collective intelligence - even though no-one is in charge. It is a phenomenon that exists at every level of experience, and will revolutionize the way we see the world. Exhilarating J.G. Ballard A dizzying, dazzling romp through fields as disparate as urban planning, computer-game design, neurology and control theory Economist Mind-expanding . intelligent, witty and tremendously thought-provoking . Popular science books interesting enough to read twice don t come along all that often Guardian Not just a fascinating quirk of science: it s the future The New York Times Steven Johnson is the author of the acclaimed books Everything Bad is Good for You, Mind Wide Open, Where Good Ideas Come From, Emergence and Interface Culture. His writing appeared in the Guardian, the New Yorker, Nation and Harper s, as well as the op-ed pages of The New York Times and the Wall Street Journal. He is a Distinguished Writer In Residence at NYU s School Of Journalism, and a Contributing Editor to Wired.
