Brand New Book ***** Print on Demand *****.Excerpt from The Foundations of Rhetoric The Introduction sets forth as simply, clearly, and compactly as possible the leading facts of English grammar, including definitions of technical terms. The body of the book is in three Parts. Part I., which treats of Words, is divided into two books: in Book I., proper and improper expressions, arranged for convenience in classes that correspond to the several parts of speech, are set side by side; in Book II., questions of choice between words equally proper are considered. Part II., which treats of Sentences, is divided into two books: in Book I., good and bad sentences, arranged for convenience in chapters that correspond to the five important qualities of style, are set side by side; in Book II., questions of choice between sentences equally proper are considered. Part III. treats of Paragraphs. Believing that every one should be encouraged to do work for himself, I begin the discussion of every question with an example, - a practice which enables the student to discover for himself the rule under which the example falls. For young scholars this is the true order; for it is the order in which the mind naturally works. In experience, facts come before principles or rules: induction precedes deduction. Believing that attention should be drawn primarily to good English, I have, in every case in which proper and improper forms appear side by side, placed the proper form where it will first catch the eye. Within the prescribed limits, it is of course impracticable to enumerate all possible departures from propriety in the choice of words or in their arrangement.
